

# Landscapes, memories and glimpses of the future of sheep farming in Northern Tuscany

**Lucia Giovannetti**  
IRTA-Leonardo (Istituto Ricerca  
Territorio e Ambiente), Pisa

## Apuan Alps and Apennines: Two different mountains and two different examples of exploitation now

The two mountain ranges, Apuan Alps and Apennines, have extremely different geological, morphological and climactic features. **Apuan Alps**, despite its recognition of **Regional Park**, have **marble quarries** destroying its original landscape; **Apennines** otherwise are well enhanced by **National Park (Reserve of Biosphere, MAB Unesco program)**, imprinted on a **sustainable development** mainly based on slow and responsible tourism.

## Apuan Alps and Apennines: similar models of exploitation given by pastoral activity in the past

In summer time these mountains offered their **pasture lands** (called '**Alpi**', '**Alpeggi**') to many flocks; in autumn, shepherds and flocks descended from the Apuan Alps and Apennines mountains to gain the flat areas around Lucca and Pisa and in southern Tuscany (Maremma).

## Just an idea of zoo-technical heritage in movement

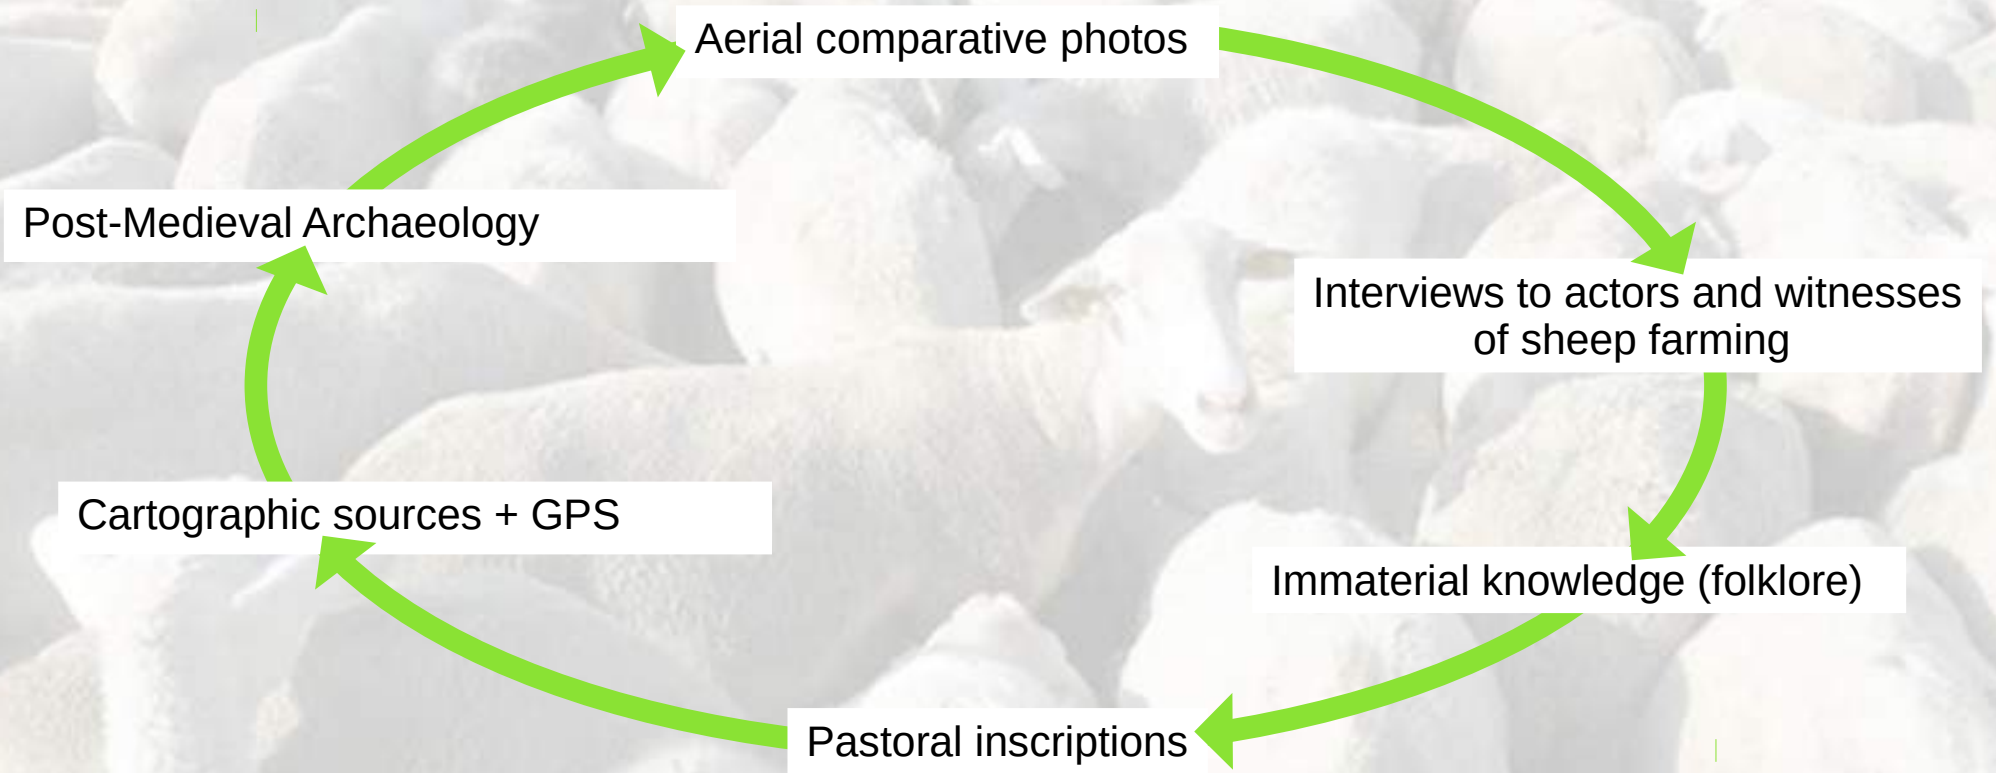

At the **beginning of 17 cent.**, the territory of **Sillano in Garfagnana** had **16.000 sheep** and 150 cows. (it means 258 sheep per kmq!)

**1630 – Garfagnana and Lunigiana in turn had passed by flocks from North** (Emilia region): during the plague 600 shephards and support workers from Reggio territory got stuck in Castelnuovo with **15.000 sheep, 9.000 goats, 650 horses...**

**...Transhumance routes builder!**

# Methodology of Research

**Different sources in dialogue** to study pastoral organization  
In Garfagnana and Lunigiana in the last 3 centuries...

# Oral sources between memories and new projects

## Past, Present, Future (?)

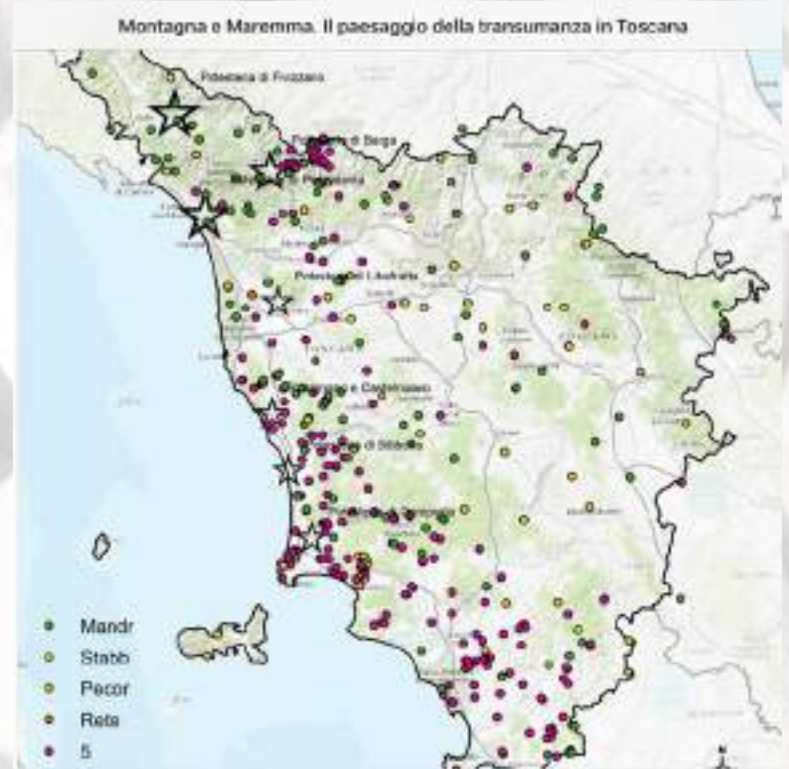

**Horizontal Transhumance** involves the long-range flocks moving from northern Tuscany to Maremma (southern Tuscany) (until 10 days walking).

2014

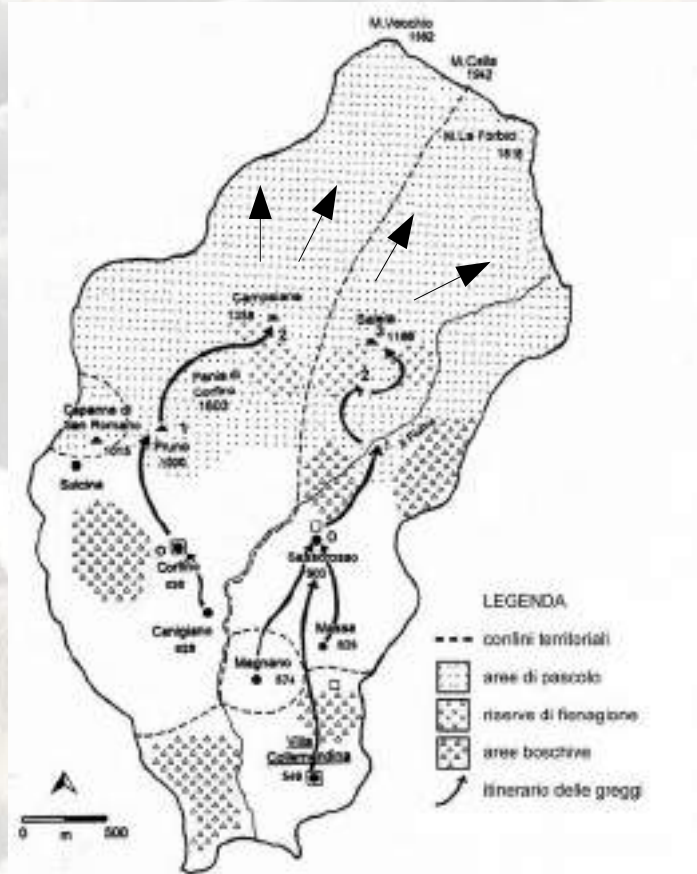

IRTA -Leonardo acquisition (from oral sources and analysis of pastoral toponyms)

## Not only Maremma

Northern Tuscany was subject to both horizontal and vertical transhumance. In the last months of research **we focused on local vertical transhumance.**

It involves the short-range, local flocks moving towards plains/mountains (**1-3 hours walking**).

Thanks to rural statutes (16-18 centuries) we are able to reconstruct the period of **flocks' progressive ascent** from villages to alps and their permanence at different altitudes. **The mountain appears as an economic space whose exploitation is calibrated on forage resources.**

# Pastoral exploitation of different elevations reflects in settlement pattern

**Villages:** stable settlement  
(700-900 mt altitude)

**Alpeggi:** pastoral villages localized in the  
summer pastures (1000-1300 mt altitude)

The **stable settlement is located no higher than the quote of vegetation of chestnut tree.** Infact chestnut flour replaced wheat flour in the diet of these communities and chestnut cultivation was carried on in the vicinity of the villages (“**Silvo-pastoral economy**”).

# Vertical Transhumance: Pieve Fosciana-Capraia-Apennines ridge

1680 mt

1300 mt

1000 mt

340 mt

**Small flocks (50-80 sheep) and consolidated relationships with local peasants in the Fosciana plain allowed Capraia's community to avoid a long-distance transhumance.**

The **high density of micro-toponyms** related to Capraia area and **material/oral sources** try **fixed scattered permanent farms (900-1100 mt)**.

These farms guaranteed family and flocks/cows/pig subsistence but the **integration with *alps* in summer and Fosciana's plain in winter** was indispensable.

# The pastoral imprint on places and architecture

**Long transhumance broke off just over mid-20<sup>th</sup> century; while the vertical one in some cases continued until the 1980s: these practices quickly ended in silence but many remains on the ground return us the magnitude of the phenomenon.**

# Recurring features reflecting sheep breeding in the villages

Sassorosso, 900 mt

Metello, 982 mt

house aged 1771

**Living-spaces for persons and animals are obtained in the same building.**

# Campaiana

1358 mt altimetry

A case of **centralized pastoral settlement** in the Apennines of Villa C.

# Campaiana

Huts with rye-straw roofs and dry stone walls: a perishable architecture

## Casini di Corte, 1184 mt

Huts can rarely be dated

## Campaiana

The “casere” or “caselli”: cheese-laboratories  
(the original roofs are made of sandstone slabs)

Chimney on the wall  
with opening/closing  
valve.

## Agriculture areas near the mountain pastures

The terraced fields near the pasture land were farmed for the **production of vegetables (potatoes) and robust mountain cereals (rye).**

**Terracing of dry stone walls** testify this agricultural past.

From interviews with the last first-hand witnesses we know that **this agricultural use generally ended after the Second World War.**

*«Item ordiniamo (...) che sia lecito per lo spazio di nove anni a ciascheduna famiglia del comune di seminare e di partire tutti li beni di Peligli, Poggiaccio, Campaiana, Isera, il Prado, Poggio di Chiappella e Lavacchio»*  
(Rural Statute of Corfino, 1738).

## Agriculture areas at 1000 mt: Arni (com. di Stazzema)

# Views of *alpeggi* from compared aerial photos (*Patatai* area, 1200 mt)

## Campaiana e Salera, 1300 mt

The forest advances...we see a strong **phenomenon of re-naturalization** in the last 60 years

“The climate change will push us in mountain again” (Luca Mercalli)

# Valle di Soraggio

## Ways to alps: conservative traces of millenary passages

No longer used for transhumance, but **their rediscovery and disclosure could add attractiveness** for slow tourism, environmental and territorial education.

# A database in the making...

## Following the flock...

# CamBio VIA

(CAMmini e BIOdiversità: Valorizzazione Itinerari e Accessibilità per la Transumanza) progetto con l'obiettivo di migliorare l'efficacia alle azioni pubbliche nel proteggere, promuovere e sviluppare il patrimonio naturale e culturale rappresentato da aree protette, parchi e siti storici lungo l'itinerario della transumanza.

LA TRANSMANZA IN GARFAGNANA: PASSATO E PRESENTE

CONFERENZA  
SABATO 30 LUGLIO 2022  
DALLE ORE 11:00 ALLE ORE 19:00  
PALAZZO CARLI - BELIJO

12:45-18:30 Partecipazione attiva con la transumanza in Garfagnana e visita al Museo della Transumanza

CAMMINATA DELLA TRANSMANZA  
DOMENICA 31 LUGLIO 2022 ORE 10-19  
LARIO DI GARFAGNANA

Partecipazione attiva e coinvolgimento della transumanza in Garfagnana alle Caselle di Capella. Alle 10:00 Partecipazione attiva con la transumanza in Garfagnana e visita al Museo della Transumanza. Alle 12:45-18:30 Partecipazione attiva con la transumanza in Garfagnana e visita al Museo della Transumanza.

La cooperazione al centro delle Mediterraneo | La Cooperazione al centro del Mediterraneo

## Signs of devotion along alps' ways

Small chapels act as a shelter in case of bad weather:  
**a neglected cultural heritage.**

## Pastoral epigraphs: “stone documents”

On pastoral buildings or on natural rocks outcropping in the pastures, they tell us about moods, need and desires of **distant shepherds without any traces in archival sources.**

# The Zeri valley case: a glimpse of future in a pastoral landscape still vital

In 2001 at Zeri, in the western corner of Lunigiana, was born the “**Consortium for the enhancement and protection of the zerasca sheep and lamb**”(an autonomous rustic sheep breed adapted to this climate and soil).

# Solidal economy: the care of biodiversity generates a microeconomy which protects and enhances the territory and community of Zeri Valley

In 2019 the “**Community cooperative Ziri Valley**”, a whole female initiative, was inaugurated. Many women now dedicate to sheep farming. The main aim is to **regenerate the territory through the short supply chain and quality production...**

- updated techniques of **cheese** making;
- local slaughterhouse and sheep **meat** as gastronomic excellence;
- **wool** no more as wast but as raw material for crafts.

The **main effort** of these new shepherd women is to create and **“to communicate” the value** of a market recognized and supported by the **sense of belonging to this unique territory...**

**THANKS FOR YOUR ATTENTION!**
